

ARCHAEOLOGICAL FIELD DIRECTORS AND FIELD TECHNICIANS (ARIZONA)

ARIZONA • CALIFORNIA • NEVADA • OREGON • WASHINGTON

Harris Environmental Group, Inc. is seeking field archaeologists for cultural resources survey and monitoring projects throughout Arizona. We are looking to fill both Field Director and Field Technician positions. These positions are temporary and project-based. The ideal candidates will be local to the Tucson area and available for on-call work.

Job Duties and Responsibilities:

Field Technicians are responsible for assisting the Field Director in identifying and recording cultural resources in the field.

Field Directors are responsible for supervising and directing fieldwork on-site and making initial evaluations and recommendations for significance, effect, and treatment of resources.

Field Directors will work closely with the Project Director and Principal Investigator to ensure that projects are completed safely, effectively, and on time.

Qualifications:

Bachelor's degree in anthropology or related field (individuals with significant experience without a degree will also be considered)

At least 12 months of supervised experience in cultural resource management

Competence with basic GPS devices

Ability to walk several miles daily over uneven terrain

Ability to work in hot conditions

In addition to the above qualifications, the minimum qualifications for Field Director positions include:

At least 4 months of cultural resources survey experience in the Southwest

Ability to supervise field technicians

Please indicate in your application if you have previously been listed as a Field Director or Project Director on a federal or state permit.

Pay is dependent on experience and education.

To apply, please send cover letter with date of availability and resume with references to:
